SIGN

Please replace the paragraph beginning on page 9, line 21, and ending on page 9, line 20
with the following amended paragraph:

- Figure 1 shows an illumination module according to the invention and its
 installation on a frame for holding a sign;
- Figure 2 shows the configuration of the illumination module according to
 the invention, fitted to the frame, with an open horizontal limb;
- Figure 3 shows a cross section through an aluminum half-profile, from
 which the illumination module is mainly formed;
- Figure 4 shows an illumination module according to an embodiment of the
 invention and its installation on a frame for holding a sign.

Please replace the paragraph beginning on page 13, line 29 and ending on page 13, line 34 with the following amended paragraph:

Furthermore, the sign may be illuminated by an LED sheet 30 which is fitted to the sign 1, rather than by means of LED illumination bars. This LED sheet 30 is transparent and white light is introduced into the sheet from above by means of diodes, which light then strikes the sign which is located underneath it, and illuminates it.
